Hi Justin,

Yes we do need to document that. Here are the instructions sent to VGI:

Windows Defender Disable Instructions

1. Find and launch Windows Defender

2. Note on the Home screen it says by default that Real-time protection is enabled.

Windows Defender	
C status: Protected	
Home Update History Settings	? Неір
Your PC is being monitored and protected.	Scan options:
 Real-time protection: On Virus and spyware definitions: Created 575 days ago 	<u>S</u> can now
Scan details Last scan: 3/12/2014 at 12:48 PM (Quick scan)	

3. Go to the Settings tab and note the check box for "Turn on real-time protection"

		Windows Defender	- 🗆 🗙
PC status: Protect	ed		
PC status: Protect Home Up Real-time protect Excluded files and Excluded file type Excluded process Advanced MAPS Administrator	late History ion I locations s	Settings ✓ Turn on real-time protection (recommended) Real-time protection alerts you whenever malicious or potentially unwanted softwa attempts to install itself or run on your PC.	
		· · · · · · ·	

4. Uncheck the box and click "Save Changes"

Re: Disabling Windows Defender

	Save changes <u>C</u> ancel	

5. Go back to the Home screen and confirm that Real-time protection is off

Reboot your computer!

Hi Andy,

Do we need to document how to fully disable Windows Defender in the 7.1.0.4

```
build? I recall that removed the seeking issue.
